PROFILE

College, I am 24yo college graduate. During my time there, I've gained a range of knowledge in the IT field. I gained experience from a high school CCNA course which peaked my interest in computers. I took that and learned programming languages ranging from the basics in C++ to advance skills in PL/SQL.

Volunteering, During my time at BYU-Idaho, I volunteered for two years with Student Support. During my time there, I gained experience in several different leadership positions. Since 2014, I've volunteered with Catholic Community Services mentoring refugee children.

Career, My career goals is to get into Web & iOS App development, and eventually start a marketing business where I can design websites, advertisements, and potential apps for other companies.

EDUCATION

Bachelor of Science - Computer Information Technology
Brigham Young University - Idaho, Rexburg, ID 83440
Graduated 2014, December

SKILLS

HMTL5	CSS3	jQuery	PHP	Adobe Suite
PL/SQL	Java	Networking	Swift	Wordpress

EXPERIENCE

Web Developer - DentalCMO: I develop new and update current sites for different dental offices. I ensure that all new and current websites are fully responsive for mobile devices. During my time, I eventually created a brand new Wordpress theme, from the ground up, that we can develop new sites based off of.

UI/UX Design Intern - OpenBook: I design and create new pages for their travel agency customers. These pages include branding booking tools used by major websites, Washington Times being one. Along with those pages, I create fully functional widgets & and pages all currently used by our company and many of our customers.

Main Web Developer - BYU-I Housing & Student Living Office: I lead the development of several new page designs. Among some of the projects, I created a custom dynamic video player, changed their site from an images based site to a code based site, and created a new design and layout of their site. Apart from my responsibilities as the Main Web Developer, I was in the team that created a video for our department.
